EXPERIENCE

NCC Group, Manchester — *Software Build Consultant*

March 2019 - Present

Operating as part of a dedicated team to create build environments to ensure that software applications can be rebuilt from their component source code in an independent secure test laboratory.

- Gathering information via technical reports, questionnaires and pre-sale scoping calls to identify the technology stack required to recreate a build environment.
- Procuring and organising the purchase of any third party software, software licenses or utilities to create a build environment.
- Creating and ensuring a complete list of third party software development tools are available to the team.
- Setting up virtual build machines to transform source code into an executable format.
- Liaising directly with software vendors and licensees to troubleshoot and resolve any problems encountered during the build process and testing.
- Producing a technical report containing the key information to rebuild software.

NCC Group, Manchester — *Verification Consultant*

November 2015 - March 2019

Visiting UK and global client sites, to audit and document the process required to build and deploy software applications from their component source code.

- Project management and delivery of various business continuity solutions and services.
- Collaboration alongside developers to understand and discuss the processes being documented.
- Delivering a strong customer focused service in an efficient and proactive manner.
- Exposure to a vast array of build and deployment tools.
- Delivering high quality technical documentation.

NCC Group, Manchester — *Integrity Test Analyst*

December 2014 - November 2015

Integrity testing of standard deposits. Validation and verification of source code deposits in a fast paced environment.

- Processing customer deposits efficiently.
- Administration and technical support to client accounts on the external customer deposit portal.
- Logging of integrity test results in the corporate systems.
